Carling Switch Wiring Instructions

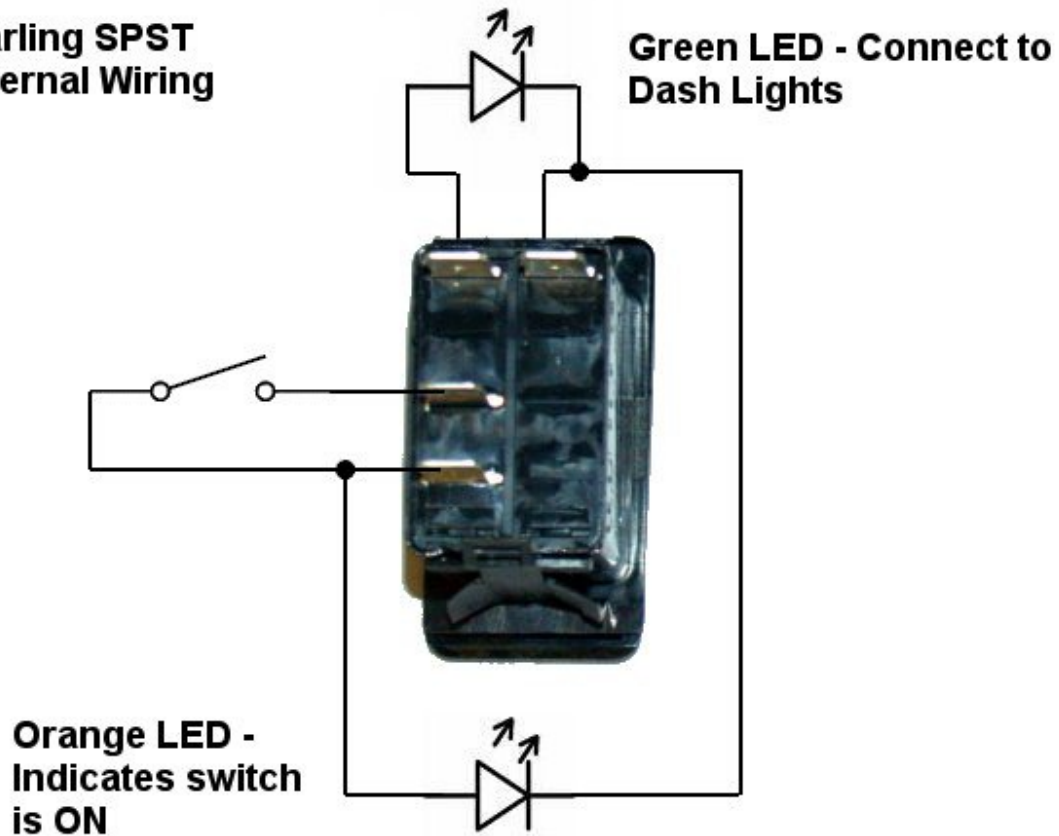

Thank you for buying a Carling Contura Switch from us.

The diagrams below show each of the three styles of switch we supply along with the internal circuit.

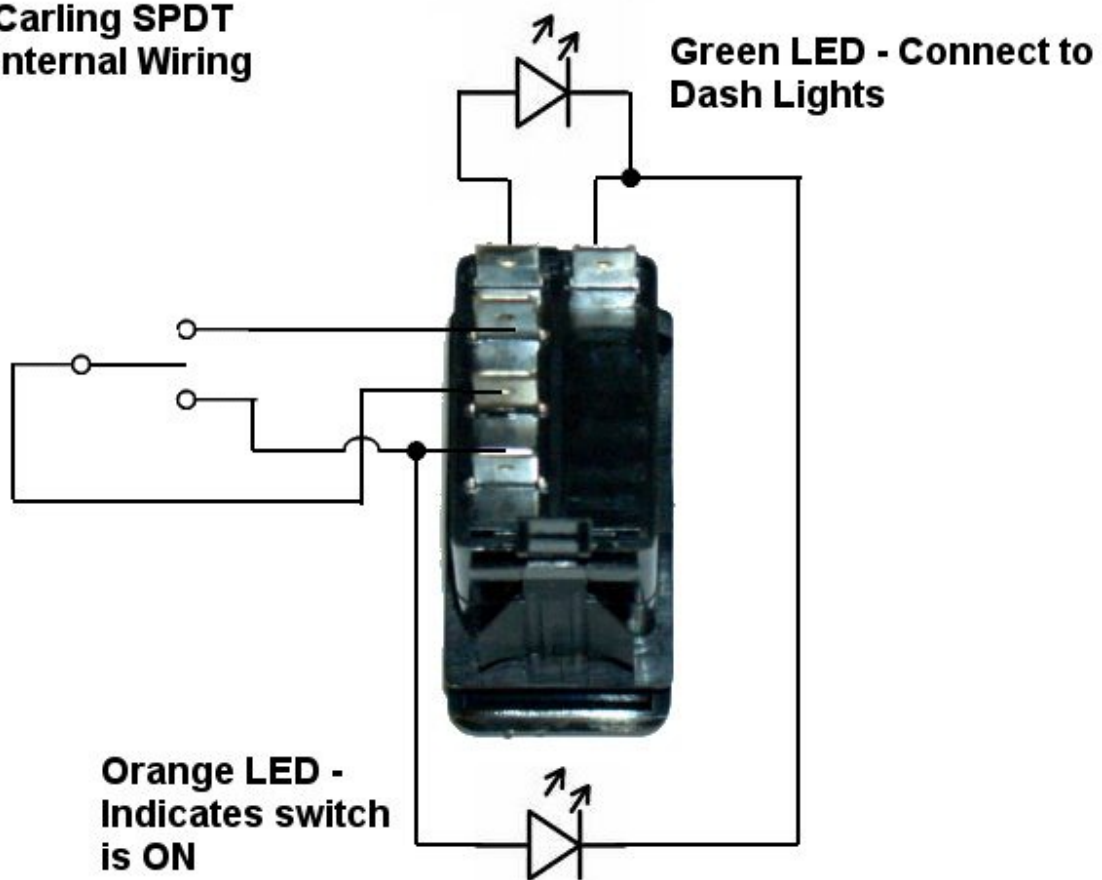

The internal LED lamps are rated at 12 to 24v DC. Remember that current will flow through the LED in the direction of the arrow on the symbol on the diagrams. If the battery is connected the other way round, the LED will not be damaged, but it will not light!
